Realism

The history of the world can be told through accounts of great battles, the lives of kings and queens, and the discoveries and inventions of scientists and explorers. But the history of the way people think and feel about themselves and the world is told through art. From paintings of the hunt in prehistoric caves, to sacred art in the Middle Ages, to the abstract forms of the 20th century, movements in art are the expression of a culture. Sometimes that expression is so powerful and compelling that it reaches through time to carry its message to another generation.

Reacting against the dominant Romantic tendencies of their day, French painter Jean-François Millet (shown) and others strove to depict realistic portraits (opposite) and landscapes, fostering a new artistic movement known as Realism.
