CRYPTONAR RECOVERY INFORMATION.txt - Notepad2
File Edit View Settings ?
[Icons]
1 Your important files including photos, videos, documents, databases, etc. were encrypted
2 with our Cryptonar ransomware. The only way to get your files back is to pay us. Otherwise,
3 your files will be lost forever.
4
5 Important note: Removing Cryptonar will not restore access to your encrypted files.
6
7 Encryption was made using a unique RSA-2048 public key generated for this computer. To
8 decrypt files you need to acquire the private key (decryption key).
9 The only copy of the private key, which will allow you to decrypt your files, is located on
10 a secret server in the internet; the server will eliminate the key after 72 hours since its
11 generation (since the moment your computer was infected). Once this has been done, nobody
12 will ever be able to restore your files.
13
14 In order to receive your decryption key, you will have to pay $200 in bitcoins to this
15 bitcoin address: 1Feutvrveif8Qdnnx9Rr3cysfnc6c6wq
16
17 When time comes to send the bitcoins to us, make sure to include your e-mail and your
18 personal ID (you can see it below) in the extra information box (it may appear also as 'Extra
19 note' or 'optional message') in order to get your personal decryption key. It may take up to
20 6-8 hours to take your personal decryption key.
21
22 After the payment was made, and you received your decryption key, just press the decryption
23 button in the decryptor (located on the desktop). Enter your decryption key you received,
24 and wait until the decryption process is done.
25
26 Your ID: 8CBEF350078BF8FF000206A7
